- UI/UX implementation
- Figma/PSD to Website Conversion

Backend & Database

- Node.js
- Express.js
- MongoDB

Design & Media

- Adobe Photoshop
- Adobe Premiere
- Pro After Effects

ABOUT ME

I'm a **MERN Stack Developer** and **Frontend Engineer** focused on building accessible, pixel-perfect, and responsive user interfaces. I specialize in creating scalable frontend systems with clean architecture, reusable components, and modern development workflows.

With hands-on experience developing **Full-Stack, API-driven applications**, I bridge design and engineering to deliver intuitive user experiences. I also maintain design systems, work with CI/CD pipelines, and contribute to open-source projects.

Beyond code, I leverage **Adobe Photoshop, Premiere Pro, and After Effects** to create polished UI mockups, motion graphics, and product demos.

EDUCATION

Bachelor of Software Engineering

NUML University

2024-2027
